

Trailer Tarp

How about an easy, quick, no muss no fuss way to clean out your trailer?

This plastic Trailer Tarp is a miracle worker!

I use my 2 horse slant to stay in while I'm camping and needed a way to clean out the back - clean enough to sleep back there.

Made from heavy mil plastic with a reinforcement of duct tape along the top edge. I've used this same piece for about 4 years now.

It's attached to the trailer using peel and stick hooks by Command Adhesive. (see bottom picture) and I cut two slits in the tape to hook it on.

I put some shavings on the bottom edge of the plastic and when it's time to clean up, just unhook the top, pick up and carry out the whole mess and dump it. I do wash off the plastic between trips.

The floor and wall are perfectly clean and ready for my cot or air mattress to be set up. Even if you are not staying in your trailer, The Trailer Tarp makes clean up easy and effective. Also minimizes the damage to the floor boards from urine and wet manure.
